

DEVANGAM BHARGAVI

Java Backend Developer

Andhra Pradesh | +91 9182166306 | bhargavidevangm@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Developer with 2+ years of experience building secure, scalable, and high-performance enterprise applications using Java, Spring Boot, and PostgreSQL. Experienced in developing REST APIs, optimizing database performance, automating batch processing, integrating payment gateways, and implementing AI-powered legal document processing solutions. Passionate about building reliable backend applications and continuously learning modern backend technologies.

TECHNICAL SKILLS

Languages: Java

Backend: Spring Boot, Spring Security, REST APIs, JPA/Hibernate, JWT Authentication, Batch Processing

Database: PostgreSQL, Query Optimization, Database Indexing

Cloud & Monitoring: AWS CloudWatch

Tools: Git, Swagger, Postman

Concepts: Microservices, API Integration, Performance Optimization, Secure Coding, AI Integration

Currently Learning: Apache Kafka, Redis, Docker

PROFESSIONAL EXPERIENCE

Software Engineer – APCFSS (Intern: Sep 2023 – Jun 2024 | Full-Time: Jul 2024 – Present)

- Optimized PostgreSQL queries and indexing, reducing API response time from minutes to seconds and improving application performance by over 80%.
- Implemented scheduler-based batch processing to automate synchronization of 6,000+ High Court case records.
- Built secure backend APIs and pipelines for the eSHRAM project, processing 15,000+ encrypted labour records per file.
- Developed secure REST APIs for SBI ePay integration with AES-256 encryption and real-time payment tracking.
- Implemented a standardized global exception handling framework with consistent API response structures.
- Developed AI-powered legal document extraction and summarization solutions.
- Resolved critical vulnerabilities including SQL Injection, CORS, and Access Control using OWASP best practices.
- Collaborated with cross-functional teams to deliver scalable backend modules for enterprise government applications.

PERSONAL PROJECTS

Court Case Management System – Spring Boot, Spring Security, JWT, PostgreSQL, Redis, Kafka & Docker. Built an enterprise-grade backend application with JWT authentication, role-based authorization, Redis caching, Kafka integration, Swagger, Excel export and Docker support.

AI Legal Document Processing – AI-powered backend application for extracting, analyzing and summarizing legal documents with scalable REST APIs.

EDUCATION

Bachelor of Technology in Computer Science and Engineering – RGUKT RK Valley

KEY ACHIEVEMENTS

- Reduced API response time from minutes to seconds through PostgreSQL optimization.
- Automated synchronization of 6,000+ High Court case records.
- Integrated SBI ePay payment gateway with AES-256 encryption.
- Strengthened application security by resolving critical OWASP vulnerabilities.
